

Gutter guards

Protecting gutters from debris build up saves your customer time and money and prevents the need for costly repairs. At Roofing and Sheetmetal Centre, we offer a range of solutions, so why not make gutter protection part of your roofing solution.

- ▶ Save time on ongoing maintenance by reducing the chance of gutters becoming blocked
- ▶ Avoid costly repairs when buildings become damaged by water overflow as a result of blocked gutters
- ▶ Improve water quality in water tanks by reducing potential for contamination
- ▶ Protection from ember attacks in bushfire zoned properties

Gutter guards

Roofing and Sheetmetal Centre gutter guards are custom made from Australian steel and can be punched in 10mm square, 30mm x 5mm or 10mm radius filtered patterns. Ask us about other options including Zinalume® or Colorbond®, stainless steel, copper or aluminium.

Gutter guard product specifications:

- ▶ Made from galvanised steel. (Colorbond or stainless steel as custom option)
- ▶ Available in 1200mm lengths
- ▶ Widths available: 300mm, 480mm & 560mm
- ▶ Punched in 10mm square, 30mm x 5mm or 10mm radius
