Customised sheetmetal solutions

Specialising in the manufacture of products for the building, plumbing and roofing industries, Roofing & Sheetmetal Centre supplies a wide range of custom made sheetmetal products for residential and commercial construction projects.

Our Melbourne workshop is fully equipped with a range of engineering machinery capable of a high degree of customisation. Our team includes qualified sheetmetal tradesmen who together hold years of collective experience.

Why choose Roofing & Sheetmetal Centre?

Many of our customers choose Roofing & Sheetmetal Centre because they trust us to deliver a high-quality product. We've worked in this industry for many years, we understand deadlines and the importance of keeping projects on time, and under budget.

We will work with you to ensure quality outcomes for your building projects.

Our products are proudly Australian. We use 100% Australian Colorbond® steel, so when you choose Roofing & Sheetmetal Centre, you support Australian jobs and local manufacturing.

Expert team

First class tradespeople with years of experience who take pride in making high quality sheetmetal products to your specifications.

Quality

We use 100% Australian Bluescope Steel for all our Colorbond® products - steel that is made for, and tested in Australian conditions.

Customisation

We know that every project is different so you need a custom-made solution. We'll make your products to suit your needs.

Onsite Delivery

We offer delivery around Melbourne metropolitan area, as well as regional Victoria.
