

Heavy Duty "Biff Buster" Pipe Guards

Roofing & Sheetmetal Centre's Heavy Duty "Biff Buster" Pipe Guards are made of tough galvanised steel and are used to prevent damage to downpipes, fire safety equipment, and other services that may be exposed to vehicular traffic. Useful in areas where cars, trucks and forklifts are operating such as commercial car parks, garages, and loading docks.

These pipe guards are very compact, fitting 150mm PVC pipe, while maximising surrounding space for vehicles and equipment.

Product specifications

Our standard pipe protection guards will protect a 150mm PVC pipe (fixed flush to the wall). Customised guards can be made to specification, with additional option for reflective tape for additional night visibility.

- ▶ 600mm height x 178mm width x 175mm depth
- ▶ 3mm powder coated galvanised steel for high strength protection
- ▶ Colour choices include unpainted, high visibility safety yellow, unpainted, or match to Colorbond colour
- ▶ Pre-punched 10mm holes for easy mounting
- ▶ Supplied with 4 x M10 Dyna Bolts for installation
